MUHAMMAD USMAN RANDHAWA

Senior Flutter & AI Mobile App Developer

Lahore, Pakistan (Remote) | +92 323 4607004 | osmanjaved2@gmail.com | linkedin.com/in/muhammadusmanrandhawa | osmanjavaid10.github.io/portfolio

PROFESSIONAL SUMMARY

Freelance Flutter & AI mobile app developer with 5+ years' experience helping founders turn ideas into launched iOS, Android and web apps. I own the full build single-handedly: Figma UI, app logic, backend (Supabase, Firebase, FastAPI or your stack), payments, AI features and store release. Built 15+ apps across food delivery, marketplaces, health & fitness, fintech and field sales, including client apps and production-quality product demos. I also rescue existing apps by fixing crashes, slowness and App Store/Play Store rejections.

CORE EXPERTISE

AI Mobile Apps (Gemini, OpenAI, RAG, AI Vision) • Flutter Cross-Platform Development • FlutterFlow + Custom Code • Figma to Flutter UI • Real-time Apps (Supabase, Firebase) • Offline-first Apps & Data Sync • REST API & Third-Party SDK Integration • Payment Integration (Stripe) • App Store & Play Store Deployment • App Rescue, Bug Fixing & Optimization

TECHNICAL SKILLS

- **Mobile:** Flutter, Dart, FlutterFlow, Android, iOS, Flutter Web, Riverpod, Bloc, Provider, GetX, MVVM, Clean Architecture, Figma to Flutter
- **Native Android & iOS:** Kotlin, Java, Swift (platform channels, native modules, plugin and build fixes, bug fixing in native apps)
- **AI & ML:** Google Gemini API (text & vision), OpenAI API, LLM integration, RAG (retrieval-augmented generation), prompt engineering, structured JSON outputs, AI vision / OCR
- **Backend & Databases:** Supabase (Auth, Postgres, Realtime, Storage), Firebase (Auth, Firestore, Cloud Messaging), PostgreSQL, Python FastAPI, MySQL, SQLite, Hive, Node.js and Laravel (PHP) REST API development
- **APIs & Integrations:** RESTful APIs, Stripe payments, Google Maps & GPS, Google Sign-In, OTP authentication, push notifications, Bluetooth thermal printers, PDF generation
- **DevOps & Tools:** Git, GitLab, CI/CD pipelines, automated testing, VPS deployment, Play Console, App Store Connect, AI-assisted development workflow
- **Web:** HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Freelance Flutter & AI Mobile App Developer – Self-employed, Remote

Nov 2026 – Present

- Building MVP mobile apps for startups, from idea and Figma to App Store & Google Play launch.
- Rescuing existing apps: fixing crashes, slowness, API issues and App Store/Play Store rejections.

Senior Flutter Developer – Consus Solutions, Lahore, Pakistan

Jan 2021 – Oct 2026

- Built and shipped cross-platform Flutter apps for Android and iOS, from Figma designs and REST API integration through to Play Store and App Store release.
- Developed an offline-first sales order & distribution app for FMCG distributors with route visits, geo-tagged check-ins, photo proof, Bluetooth receipt printing and automatic SQLite/Hive sync.
- Delivered a multilingual accounting & finance app with OTP login, PDF statements, voice-note proofs, WhatsApp sharing and automatic cloud backup and restore.
- Built a currency exchange & rate tracker app with live city-based rates, a converter, rate alerts, a branch locator and currency reservation orders.
- Applied Clean Architecture, MVVM and state management (Riverpod, Bloc, Provider, GetX), with Git workflows, CI/CD and automated testing for reliable releases.

KEY PROJECTS

Morsel – Food Delivery Platform (Product Demo) | Flutter, Supabase, Stripe View project
Four connected apps (customer, restaurant, rider, admin) on one Supabase backend. Supabase Realtime pushes each order instantly from restaurant to rider while the customer tracks every status live; Stripe card payments, menu management, rider earnings and push notifications.

SnapCal AI – AI Calorie Tracker (Product Demo) | Flutter, Google Gemini (vision) View project
Snap a meal and Gemini identifies each food with calories and macros. Designed prompts that return clean structured JSON per food item; daily calorie ring, macro and water goals, weekly insights and streaks.

AskDoc – AI Document Chat (RAG) (Product Demo) | Flutter, Google Gemini, RAG View project
Chat with PDFs, receipts and photos. Built a RAG pipeline that chunks documents and sends only the most relevant parts to Gemini, keeping answers grounded and API costs low; instant summaries and AI vision scanning.

Aussie Rides – Car Marketplace (Product Demo) | Flutter (Android, iOS, Web), FastAPI, PostgreSQL
View project
Used-car marketplace with smart filters, saved search alerts, 4-step listing flow, My Ads dashboard and buyer-seller chat. Indexed PostgreSQL queries and paginated FastAPI endpoints keep search fast at scale.

BookMySalon – Salon Booking App (Product Demo) | FlutterFlow, Custom Flutter Code, Firebase View project
Salon and spa booking with real-time slot locking in Firestore to prevent double bookings, automatic 24h and 1h reminders, and an owner dashboard for schedule, services and revenue.

FitTrack Coach – Gym & Personal Trainer App (Product Demo) | FlutterFlow, Custom Flutter Code, Firebase
View project
Workout plans, one-screen set logger with auto rest timer, PR/1RM tracking, progress charts, body stats and a trainer dashboard for managing clients.

Sales Order & Distribution App (Consus Solutions) | Flutter, REST APIs, SQLite, Hive, GPS, Bluetooth
View project
Field sales app for FMCG distributors: shop routes, geo-tagged check-in/out, orders, thermal receipt printing and a supervisor dashboard for targets and team performance; works fully offline.

Accounting & Finance Management App (Consus Solutions) | Flutter, Firebase, SQLite, REST APIs
View project
Ledgers for customers and suppliers, cash and bank accounts, invoices, receipts and PDF financial statements; offline-first with secure cloud backup, OTP login and multi-language support.

Currency Exchange & Rate Tracker (Consus Solutions) | Flutter, REST APIs, Figma View project
Live buy/sell rates by city, multi-currency converter, rate alerts, branch locator and currency reservation orders for branch pickup.

EDUCATION

Bachelor of Science in Computer Science – Virtual University of Pakistan
2022 – Mar 2025 | CGPA: 3.81 / 4.00

LANGUAGES

English (Professional), Urdu (Native), Punjabi (Native)
